# It's our capabilities & approach, that make all the difference...

BOOM Sherrin has provided travel tower solutions to electricity transmission & distribution, power generation, telecommunications & water infrastructure firms across Australia. Our staff are experienced in dealing with the unique challenges created in the utilities industry. We've delivered access services on a diverse range of networks from 11kV local lines to 500kV transmission lines, & telecommunications networks.

## OUR APPROACH TO SERVICE INCLUDES:

- > Over 300 truck mounted travel towers ranging from 12m units up to a 70m Bronto towers.
- > EWP certified travel tower operators with comprehensive, equipment specific training.
- > Provision of tailored EWP & lifting solutions with the ability to combine travel towers with specialised access equipment & cranes to overcome complex project requirements.
- > Operating 24 hours a day, 7 days a week to react promptly to project changes.
- > Onsite inspections & site safety analysis to minimise project risk & tailor access solutions to overcome height, reach, site access or working surface limitations.
- > Mandatory pre-start inspections & safety checks on every piece of equipment supplied.
- > Completion & monitoring of a comprehensive Job Safety Analysis on all travel tower projects.
- > Maintenance & servicing programmes that surpass compliance to AS2550.1.
- > Dedicated national fleet & maintenance team backed by in-house mechanics & maintenance staff in every branch.
- > Staff OH&S training from our in-house programme according to AS4801.
